GO TO®

Light Cure Bracket Adhesive

- Proven bond strength and consistency
- Unique viscosity easily penetrates bracket pads
- No bracket drift - stays in place until cured
- New proprietary microfiller construction
- Translucent finish matches any tooth shade
- One piece flash removal - 'ropes' off bracket periphery
- Maximum bond strength
- Easy removal and cleanup
- UV disclosing agent - fluoresces on the tooth under black light

PRODUCT	CODE
Go To 4gm syringe	TOCR/GTP
Go To 0.4gm tips (Pk 10)*	TOCR/GTT
Mark II CR Syringe	TOCR/CRII

*to be used with TOCR/CRII syringe

Clinical applications

- Bracket and tube bonding
- Fixed lingual retainer bonding
- Bonds all metal, ceramic and composite attachments
- Clear aligner attachment material
- Viscous to allow for pre-loading of trays for indirect bonding

Excess adhesive ropes off in a single piece from the periphery of the bracket

Black light fluorescent

Crystal clear for universal shade matching with clear aligner
