Ghost™ Advanced Sapphire Brackets

Sapphire aesthetics with polycrystalline strength and durability

Recent advancements in manufacturing techniques and developments in materials have led to the exciting introduction of our new Ghost bracket. With extraordinary aesthetics, Ghost provides precision and control with superior performance features that can only be achieved with highly sophisticated ceramic injection moulding technology. The result is a truly remarkable bracket system that takes aesthetics, performance and durability to unprecedented heights.

- Brilliant aesthetics without the glare of conventional sapphire brackets
- Exceptional strength and fracture resistance
- Significantly less friction than other sapphire brackets providing shorter treatment times

Welcome to The Orthodontic Company - TOC

Founded in 1992, TOC is proud to be among the UK's largest orthodontic companies. We have been supplying our comprehensive range of products to the international market for a number of years.

High quality products at value for money prices have always been the aim of TOC in over 26 years of history supplying the orthodontic profession. We are an ISO:9001:2015 accredited company and we continually assess the quality of the products we supply to ensure the highest standard.

Vast stocks are held in our UK distribution centre ready for immediate shipment and 24 hour international deliveries if required. We strive to provide the very best customer service and our experienced team are always ready to help with any questions you may have.

TOC is an experienced orthodontic company and having worked for many years with some of the largest manufacturers in the world, we know what it takes to succeed in a competitive market.

We look forward to serving you with all your orthodontic requirements.

Verve™ Ceramic Brackets

Experience everything Verve has to offer - precision, strength and reliability.

Verve Ceramic are almost invisible as they have the highest translucency, blending naturally with all tooth shades and are highly resistant to staining and discolouration. Verve Ceramic are manufactured from the highest quality polycrystalline alumina providing unmatched strength and durability to minimise bracket fracture. The proven mechanical lock base design ensures optimal bond strength whilst also making debonding predictable and stress free. Clinically proven, Verve Ceramic will deliver exactly what you and your patients are looking for in an aesthetic bracket system.

- Made from the highest quality polycrystalline alumina for strength and durability
- High translucency to blend naturally with all tooth shades
- Resistant to staining and discolouration
- Smooth archwire slot improves sliding mechanics
- Proven mechanical lock base with dove tail grooves for optimal bond strength and predictable debonding

Envy™ Composite Brackets

First choice for value and reliability

Envy is a great alternative to ceramic brackets providing a low cost aesthetic solution for your patients. Highly translucent, Envy blends well with all tooth shades creating a natural appearance and is stain resistant to provide superb aesthetics. Manufactured from the highest quality polyurethane to create a strong bracket resistant to breakage.

Verve™

Precision, strength and reliability

Verve is precision engineered to a design that fulfils all your expectations of a high quality bracket. Created to provide great strength and reliability, with features that will allow you to treat with confidence. Now you can really enjoy using Verve and your patients will love them!

Precision Engineered

Verve has an advanced design that combines Metal Injection Moulding (MIM) and Computer Numerator Controlled Milling (CNC). MIM allows for a smaller and more detailed design which has greater strength whilst the CNC milling provides the most accurate of slots for advanced sliding mechanics.

Ease of Use

Verve incorporates many features to help with bracket placement, bonding and ligation of elastomers; the compound contoured Super-Grip™ base means there is no need to worry about accidental debonds. Bracket options include bicuspidis with an offset base making it easier to bond partially erupted teeth while still providing straight wire mechanics. The additional option of an extended bonding pad on pre-molars means the brackets are easier to position as it allows the bracket slot and more of the base to be visible during bonding. Bond strength is also increased with these bases. Bracket kits are conveniently supplied pre-loaded onto bracket orientation cards ready for bonding to save you both time and money.

Treatment Results

Verve provides you with efficient and predictable treatment case after case, with true torque in the base delivering exact bracket prescription values, accurate slots and in/out dimensions with fewer wire bends. Your patients will appreciate the comfort, look and the results too!

Bi-directional canine hook is rounded and smooth for patient comfort

Permanent ID by quadrant with removable colour coding

Chamfered tie wings for ease of ligature placement

Highly visible vertical scribe line for quick and precise placement

Super polished low friction slot for great sliding mechanics

Smooth tie wings for enhanced patient comfort

Highest grade stainless steel for maximum strength

Super-Grip™ 80 Gauge mesh base for maximum bond strength

- CNC milled slot for greater precision and more efficient treatment
- Offset and extended base options to suit your specific requirements
- Compound contouring facilitates placement
- Low profile minimises occlusal interferences
- Palladium alloy brazing for the strongest bracket-to-base bond
- Mushroom shaped hook secures chains and ligatures in place without slipping
- Torque in base for level slot alignment

Essentials™

Value Stainless Steel Bracket System

Manufactured from advanced 17-4 stainless steel, Essentials brackets offer maximum strength and reliability in performance. Stay in control of your consumable costs by using Essentials.

- **Chamfered Slot Design**
Makes wire insertion easier
- **Ultra Smooth Slot**
For reduced friction and shorter treatment time
- **Rounded Ball Hooks**
Helps improve patient comfort
- **Low Profile**
For added patient comfort
- **Proven 80 Gauge Mesh Base**
For reliable and predictable bonding
- **Centre Scribe Line**
Makes for easy and accurate placement
- **Smooth, Rounded Corners**
Means less tissue irritation

We preload your brackets on orientation cards for you at no extra cost

Verve™

Quality Prewelded Molar Bands

Precision Shaped for a Tight, Secure Fit

Each band is precisely shaped to fit each tooth securely with excellent retention

Hard but Malleable Stainless Steel

Strong enough to avoid wall collapse when fitting, yet is malleable enough for 'snap' fitting that requires little or no burnishing

Increased Buccal Height

For greater flexibility in placement and positioning of buccal tubes and lingual attachments

Micro-Etched Interiors

Provides a rough surface for increased bond strength

Permanently Etched Exterior

For easy identification

Anatomically Contoured

Fast placement and accurate fit

Permanent Marking

For easy identification

Straight Interproximal Wall

Makes band seating easy

Comparable 3M Unitek sizes

Rolled Edges

No sharp edges, maximum patient comfort

Ideally Tempered

For easy contouring

Micro-Etched Interior Surface

Ensures maximum retention

Band Conversion chart available

Hi-Q™ Archwires

A range of high quality archwires

High quality nickel titanium and thermal nickel titanium wires which are designed to provide a low continuous force, with shape superior memory and elasticity characteristics. Manufactured to precise tolerances, Hi-Q wires offer all the features and benefits you would expect from a high performance wire.

- Super elasticity - very flexible and easy to engage
- Superior shape memory - stays active right throughout treatment
- Low, constant force - for most efficient tooth movement and increased patient comfort
- Polished finish - low friction
- Rigorous quality control - every wire performs the same

Copper Nickel Titanium

Consistent high quality

The blend of copper in the raw material combined with an advanced manufacturing process provides unique benefits for you and your patients.

The lighter forces and high flexibility of Hi-Q Copper NiTi allows for easier wire engagement in moderate to severely misaligned cases and

reduces patient discomfort. Hi-Q Copper NiTi maintains a constant force and generates more consistent tooth movement as the wire is active for longer in the optimal force range thus allowing fewer archwire changes. The higher the temperature transition, the lower the relative forces delivered by the wire.

Reverse Curve Nickel Titanium

Hi-Q Reverse Curve NiTi wires offer all the advantages of super elastic continuous force levels combined with the benefits of a reverse curve wire. Designed for opening and closing the bite, they also provide excellent levelling and aligning.

Beta Titanium

Nickel-free treatment

Hi-Q Beta Titanium archwires deliver greater forces than nickel titanium without the same stiffness of stainless steel. They allow you to place larger wire sizes earlier in treatment and increase treatment efficiency.

Hi-Q Beta Titanium offers excellent bendability allowing you to form loops and bends easily. They have a smooth, polished finish for superb sliding mechanics and reduced friction. The wires are also nickel free to prevent any allergic reactions.

Stainless Steel

High quality guaranteed

Manufactured from the highest quality medical grade steel, our popular Hi-Q Stainless Steel Archwires accepts bends without breakage and provides consistent performance.

- High tensile strength
- Polished for reduced friction
- Consistent quality

Stainless Steel Posted Wires

High quality brass posted wires with the strongest solder joints in the industry. Provides excellent results during the retraction and closing of spaces as well as giving added benefits such as attaching headgear, elastics and springs. The small solder spot on the wire allows for easier archwire engagement without bracket impingement.

- Highest quality stainless steel
- Strong solder joints
- Consistent quality
- Ideal post length - 5mm
- Supplied in a unique protective box

.012" x .030" 15" Spool	15"	GC-230-21

NiTi Distalizing Springs

These stop wound springs distalize molars without having to use headgear. The springs are designed to be easily trimmed to the desired length; just determine the appropriate length and trim the spring in the middle of the closed coil section.

You can then place the spring over the archwire and when used in conjunction with an adjustable archwire lock or stop hook, provide the required force for your unique application.

7" Lengths (Pk 3)	Code
.010" x .045"	GD-145-07

Crimp-It™

Diamond coated crimpable stop/tie back

A new crimpable stop that will not slide and can also be used as a tie back.

The slot feature in the Crimp-It is faster and easier to use than creating a tie back loop in the archwire or soldering a tie back hook to the archwire. The proprietary diamond coating provides exceptional holding force; more than double that of uncoated crimpable stops.

The Crimp-It is easy to place without any special instrument and crimps without damaging or notching the archwire with no need to over-crimp due to the diamond coating.

Fits wire sizes .012" up to .012" x .025".

Code (Pk 10)

JS-125-00

Ceramic Buttons & Hooks

For a clear look with all aesthetic appliances

- For labial and lingual use
- Mesh base creates a strong bond
- Anatomy and size of base fits all teeth
- Maintains a clear look for aligners as anchorage for elastics

Product (Pk 10)	Code
Bondable Ceramic Button	JB-334-00
Bondable Ceramic Hook	JB-335-00

Precision Aligner Buttons

A button designed specifically for aligners!

- Base shaped to fit precisely within aligner cut outs
- Maximum retention through optimal surface area and unique bonding base
- Anatomically corrects to match the curvature of molar's cervical third
- Smooth rounded contours for improved patient comfort
- Improve Aligner and Class II efficiency
- Reduce emergency visits

Code (Pk 25)

JB-336-00

Bondable Buttons Round Base

- One piece
- Round curved base

Code (Pk 10)

JB-400-02

Bondable Buttons Rectangle Base

- Rectangular curved base
- One piece base

Code (Pk 10)

JB-400-00

Bondable Composite Buttons

- Aesthetic and stain resistant
- Contoured mechanical base for optimal bonding
- Ideal for use with aligners

Crimpable Ball Hooks

- With slide-on archwire opening
- .018" and .022" options available

Size (Pk 10)	Code
.018"	JH-018-10
.022"	JH-022-10

Crimpable Archwire Hooks

- With split archwire opening
- Easy to place without removing the archwire
- Also ideal for use with TADs and mini-screw attachments
- Fits archwires up to .022" x .025"

Right hook (Pk 20)	Left hook (Pk 20)
JH-101-00	JH-101-01

Crimpable Ball Hooks

- Place easily without removing the archwire
- Made from high quality stainless steel
- Smooth, rounded hook for patient comfort
- Fits archwires up to .022" x .025"

Code (Pk 20)

JH-121-01

Crimpable Bi-Directional Ball Hooks

- Place easily without removing the archwire
- Bi-directional hook for easy ligation
- Smooth, rounded hook for patient comfort
- Fits archwires up to .022 x .025"

Product (Pk 20)	Code
Short (1.6mm)	JH-111-01

Coated Crimpable Bi-Directional Ball Hooks

- Great aesthetics
- Non-sliding, strong lock with archwire
- Ball hook can be bent left or right
- Fits round or rectangular archwire up to .018" x .025"
- 4mm length

Code (Pk 10)

JH-907-00

Crimpable Mini Stops

- Mini-size stops with very low profile
- 2mm length
- High quality stainless steel

Product (Pk 25)	Code
Small (for wire sizes .012" to .018")	JS-020-01
Large (for wires .014"x.025" to .019"x.025" & square .020"x.020")	JS-020-02

Coated Crimpable Mini Stops

- For a complete aesthetic look
- Slides easily on to the archwire
- Great comfort for the patient
- 2mm in length

Product (Pk 25)	Code
Small (for round wires)	JS-907-01
Large (for square and rectangular wires)	JS-907-02

Mighty Ties™

Great value elastomerics

.115" ligature diameter, with 30 great colours for your patients to choose from!

- 1008 ties per pack (24 per stick)
- Superior elasticity with great recovery
- Excellent colour stability, resistant to fading
- Convenient tabs makes them easy to grip
- High quality medical grade polyurethane
- Latex free minimises allergic reactions

Mighty Ties™ Mini

With all the same features of Mighty Ties these single patient ties reduce waste and cross contamination.

- 1000 ties per pack (10 ligatures per stick)

TruGrip®

Reliable and consistent bonding

Light Cure Bracket Adhesive Kit

Tru-Grip gives you state-of-the-art technology so you have versatility, ease of handling, aesthetics and reliability at your finger tips. With the ability to bond ceramic, composite and metal brackets and with no bracket drift because of the ideal viscosity, Tru-Grip LC has everything you need in an adhesive. It offers a simple and comfortable application procedure combined with extremely reliable bond strength. Tru-Grip LC provides extended working time to ensure accurate bracket placement and is also a great choice for lingual bonding.

- No mixing required
- Light cure in only 30 seconds
- Ideal viscosity
- Precise placement
- Reliable bond strength

TruGrip® Light Cure Band Cement

Tru-Grip Light Cure Orthodontic Band Cement requires no mixing and provides all the working time you want together with consistent performance. Acid etching isn't necessary and curing is possible in 20 seconds with a high performance curing light. The syringe gives easy and accurate delivery of the cement reducing waste and the distinctive blue colour makes for easy clean up.

- Acid etching not necessary
- No-mixing so less waste
- Cures on demand
- High bond strength
- Contains fluoride

60g Gel Etch,
5 empty 3ml Syringes,
Luer Lock Applicator
Tips

Blue Gel Etch

12g syringe of 37% phosphoric acid gel in bright blue, which makes it easy to see for application and rinsing. Luer lock tips are angled for easy access and better control.

12g Syringe with 20 Applicator Tips (Luer Lock)

Code
TG-000-30

Liquid Etch

A thin consistency etch used to make enamel and dentin susceptible to bonding. It conditions the tooth to enhance adhesion and mechanical retention.

- 37% Phosphoric acid
- Green colour
- Viscosity similar to water
- 30ml (1fl oz) per bottle

Code
506107

Adhesive Primer Light Cure

Prepares etched enamel ready for bonding.

- Easy to use
- Trusted reliability
- For use with metal, plastic and ceramic brackets
- Ensures consistent bond strength

Product	Code
Adhesive Primer Light Cure, 7gm	TG-100-30

Porcelain Primer

For preparing porcelain crowns and veneers before bonding brackets.

Used in addition to orthodontic adhesive primers.

Product	Code
Porcelain Primer, 15ml	TOCPP

Double Ended Photo Cheek Retractors

- Brushed stainless steel to reduce glare
- Double-ended with a different size on each end for adult and child
- Longer lasting compared to plastic retractors

Sterilisable up to 320°F/160°C

Product (Pk 2)	Code
Brushed Stainless Steel	LR-159-00

Double Ended Photo Cheek Retractors

- Sturdy plastic will not crack
- Double ended for adult and child sizes
- Smooth with rounded edges for patient comfort

High Heat Cheek Retractor

Easy to use, this High Heat Cheek Retractor provides superior intraoral access for bonding and other procedures. The unique buccal extensions retract powerful buccinator muscles to provide an unobstructed view. Made from medical grade materials that withstand repeated sterilisation. One size fits all.

- Provides an unobstructed view with superior buccal access
- Comfortable for the patient
- Easy tension control
- Increased visibility to work areas

Tungsten Carbide Debonding Burs

Quantum burs are designed, manufactured and finished for optimum strength, performance and durability offering efficient debonding and adhesive removal. They are brazed at the base of the neck as opposed to the base of the head as found in many competitor products. The stainless steel shanks allows for multiple autoclave cycles without the risk of corrosion and the convenient blister packaging keeps burs safe and well protected until needed.

Exceeds all ISO, FDA, BSI and CE European standards.

Tennis™ Instruments

A Collection of High Quality, Hand Crafted Instruments

Slim, Elegant, Beautiful

Tennis instruments - starts with a great design, the finest materials and a commitment to quality. Tennis instruments are meticulously handcrafted with up to 30 painstaking steps and multiple inspection points. Tennis combines aesthetic beauty, great durability and ease of use - perfect for the modern orthodontist.

High Quality European Stainless Steel

Tennis are carefully constructed from high quality European medical grade stainless steel to guard against corrosion and to ensure long life and superior performance. Every Tennis instrument is thoroughly tested and inspected so you can be assured of the highest quality at your fingertips.

Attractive Lustre Finish

Tennis features an attractive two tone design. The main body is satin finished to be non-reflective and reduce glare. The highly polished handle ends of labial instruments and black to lingual make for easy identification.

Dependable Orbit Joint

The smooth, durable orbit joint is one of the reasons you'll enjoy reliable performance. This joint protects against debris intrusion and promises dependable alignment of the tips to give you reliable cutting or wire forming.

User Friendly Ergonomic Design

Tennis provides safety and comfort for you and your patient. With their ideal size and smooth, rounded edges Tennis are safe in operation and a pleasure to use.

Cutters

Safety Hold Distal End Cutter

For safe intraoral use, shear cuts and securely holds wire from .012" to .021" x .025". Long handled version also available.

Code

TEN301

TEN301XL (Long)

Hard Wire Cutter

The go to wire cutter - Cuts hard wire from .022" x .028" and .028".

Code

TEN304

Mini Pin and Ligature Cutter

Cuts soft wire up to .012" with the slim tips making it easy to use in awkward areas.

Code

TEN306

Micro Mini Pin and Ligature Cutter

Extra slim cutter designed for even easier access in constricted areas, for soft wire up to .012".

Code

TEN307

TEN309 (15° angled)

Pin and Ligature Cutter

A standard non angulated pin cutter for use on soft wire from .012" to .016".

Code

TEN305

Permanent I.D. Marking

Tennis instruments are engraved with the recommended wire capacity to help you choose the right instrument for every procedure, every time.

Inserted Tips

Tennis cutters feature extra hard Resist Stainless Steel inserted tips. Resist undergoes several steps to achieve the ideal hardness necessary for reliably cutting orthodontic archwires.

Pliers

Weingart Plier

The serrated beaks grip archwires firmly and the angled tips fit easily into awkward areas. A general utility plier with many practical uses.

Code

TEN302 (Standard)

TEN303 (Slim)

Three Jaw Plier

For adjusting and contouring archwires, clasps and retainer wire up to .030" without damage. The tapered beaks allows for delicate bending.

Code

TEN312

Adhesive Removing Plier

Superior tip design allows easy access to remove excess adhesive after debonding.

Code

TEN316

Band Removing Plier

For the safe and quick removal of posterior bands. The pointed beak slips under the band while the plastic tip protects the occlusal surface of the tooth.

Code

TEN317

Rectangular Forming Arch Plier (Tweed)

Great for bending and torquing archwires with no damage. For archwires up to .022" x .025".

Code

TEN318

Bracket Remover - Straight

The sharp tips grip securely between the edge of bracket base and tooth surface, lifting off the bracket with no patient discomfort.

Code

TEN319

Bracket Remover - Angled

Similar to TEN319 but with angled beaks for easier access in difficult to reach posterior brackets.

Code

TEN320

Hammerhead NiTi Cinch Back Plier

Cinches and bends NiTi archwire intra-orally distal to the buccal tube with no heat necessary. For archwires up to .025".

Code

TEN327

Light Wire Plier

Has tapered beaks which allow intricate bends and loops to be made in archwires up to .020". The smooth un-grooved beaks make it ideal for bending light wires.

Code

TEN328

Hook Crimping Pliers

Easily and quickly crimp stops, hooks and posts to the archwire. Slot fits over base of hook while holding it tight for crimping.

Code

TEN329

Bird Beak Plier

A utility plier for all types of wire bending. The round and pyramid tapered tips work round, square and rectangular archwires up to .30".

Code

TEN330

Essentials™ Instruments

Value Instrument Range

Essentials instruments are made of surgical grade stainless steel which is highly resistant to corrosion. The precise tip alignment and diamond honed edges ensures reliable cutting and holding of wires. Balanced joint assembly and well finished handles means Essentials instruments are easy and comfortable to use.

All Essentials instruments have an attractive satin finish so glare is reduced and the instruments have a pleasing quality look with no possibility of chrome plating peeling off. The cutters feature immunity steel tips for maximum performance. For safe use, cutting instruments are engraved with the maximum wire size to be used.

Value Cutters

Distal End Cutter

Safety hold cutters with immunity steel tips that will not discolour or rust. Cuts .018" x .025" and .022" hard wires.

Code

TOC-E0319

Hard Wire Cutter

Specially designed for cutting hard wires. Cuts .022" x .028" and .022" hard wire.

Code

TOC-E0353

Pin and Ligature Cutter

A standard pin cutter with tips that have an ideal length of 12mm. Cuts .012" to .016".

Code

TOC-E0330

Adhesive Remover

Tip design allows access to remove adhesive in practically any area of the mouth. Replaceable teflon pad withstands high heat sterilisation.

Code

TOC-E0427

Straight Bracket Remover

Sharp tips wedge between the edge of the bracket base and tooth surface lifting off the bracket with no discomfort to the patient. The removers grip firmly for easy horizontal or vertical use.

Code

TOC-E0381

Angled Bracket Remover

Same as above, but angled for easy access to difficult posterior areas.

Code

TOC-E0380

Short Band Removers

The padded tip rests on the occlusal surface whilst the pointed tip catches the edge of the band for upward or downward removal. High heat replaceable pads available in 4, 5 and 6mm diameter.

Code

TOC-E0373

Long Band Removers

Same as TOC-E0373, but with a longer remover tip.

Code

TOC-E0371

Value Pliers

Weingart Plier

General utility plier with serrated tips to hold archwires firmly in the mouth. Angled for ease of working and good access.

Code

TOC-E0377

Slim Weingart Plier

General utility plier with slimmer tips for easier access to difficult areas. Serrated tips hold archwires firmly in the mouth.

Code

TOC-E0375

Three Jaw Plier

For adjusting clasps, retainers and archwires. With perfectly aligned tips which are tapered for delicate bending. Bends wire up to .030"

Code

TOC-E0385

Tweed Arch Forming

Designed for double back or triple back wire bending and can accommodate .030", .036" square wires. Also ideal for torquing.

Code

TOC-E0412

Crimping Plier

Designed to crimp stops, hooks and posts to the archwire. The slot fits over the base of the hook while holding it tight for crimping.

Code

TOC-E0901

Cinch Back Plier

Cinches and bends NiTi archwires distal to the buccal tube. Slim beak allows precise working.

Code

TOC-E0802

Step Forming Plier

Make right or left, step up or step down bends in one simple action. Can be used intra-orally so no need to remove the archwire.

Size	Code
0.5 mm	TOC-E0712

Essentials Hand Instruments

Value Range

Offering great value for money, the Essentials range of Hand Instruments are manufactured from high quality stainless steel and are resistant to corrosion.

Bonding Tweezer

Reverse action tweezer for placing brackets with slot aligner on the opposite end.

Code

TOC-E0450

Bonding Tweezer - Standard

For bracket placement. Reverse action will not release the bracket until desired.

Code

TOC-E0451

Bonding Tweezer - Fine Tips

Extra fine tips for extra visibility. With slot aligner on the opposite end.

Code

TOC-E0452

Keat Tweezer

For easy and accurate positioning of buccal tubes.

Code

TOC-E0454

Keat Reverse Action Tweezer

For easy and accurate positioning of buccal tubes. Reverse action will not release tube until required.

Code

TOC-E0455

Curved Bonding Tweezer

Ideal for placing lingual brackets and attachments. Reverse action.

Code

TOC-E0510

Band Pusher

With serrated tip to reduce risk of slippage. Light weight hollow handle for easy working.

Code

TOC-E0477

Mosquito

Straight tip with a length of 12.5cm. Grooved tip for placement of elastic ligatures.

Code

TOC-E0140

Ligature Director

Double ended light weight ligature director with textured grip.

Code

TOC-E0478

Separating Plier

Grooved beaks ensure a positive hold for positioning elastics. Angled tips for ease of access.

Code

TOC-E0585

Effer-ves®

Tablets for cleaning removable dental appliances

Provide your patients with a good cleaning regime from the start with the help of effer-ves. Used on a regular basis, effer-ves kills bacteria that can build up on aligners and other dental appliances as well as removing common stains caused by tea, coffee and some foods.

- Suitable for Clear Aligners, Clear Retainers, Wire Retainers, Mouthguards, TMJ Appliances, Bruxing Appliances and Nightguards
- Easy to use
- Safe to use on acrylic and wire combinations within orthodontic appliances

Terms & Conditions

Prices

All prices quoted are exclusive of VAT and Carriage. There is no minimum order charge. TOC reserves the right to change price details as it may deem necessary without prior notice and without incurring obligation. E&OE.

Payment

Payment is to be made by credit card in advance of orders being shipped.

Delivery

Each delivery will contain a delivery note or invoice. On receipt of goods customers are requested to ensure the goods are as required before breaking any packaging or seal. Shortages or breakages must be notified to TOC within 3 days of receipt.

Quality

TOC operates a Quality Management System which conforms to all current quality and regulatory standards. This incorporates a Batch/Lot Control System for traceability of all medical devices and equipment dispatched by TOC. Customers should retain information for products supplied by TOC including Batch/Lot No. and expiry dates.

Continuing Product Improvement

Due to continuing product improvement TOC reserves the right to modify, improve and change product specification and to discontinue products without advance notice and without incurring obligation. We are not responsible for typographical or photographic errors and we reserve the right to limit quantities.

No part of TOC's catalogue, literature or website may be reproduced in any form without the permission of TOC.

All images are for illustration purposes only. All trademarks are the property of their respective owners. E&OE. TOC adheres to GDPR protocols.

*TOC versions of Roth and MBT prescriptions are not implied to be an exact version of any other system, nor do we claim any endorsement of the Doctors. © TOC. All Rights Reserved. January 2019.

Returns

All credits and returns are issued at the discretion of TOC Head Office. Customers must in the first instance call TOC Export Manager for authorisation with details of products to be returned and reasons for the return.

Under the following conditions, customers may return for credit any stock product with which they are not satisfied:

1. Products must be returned within 30 days of purchase.
2. Products must be standard catalogue items in an unopened condition and will only be accepted back from the original purchaser.
3. Written explanation must accompany the goods, stating the reason for dissatisfaction and quoting the original invoice number.
4. Returned goods must be adequately packaged to withstand delivery and carriage must be prepaid by the customer with contents insured to the full invoice value. TOC is unable to credit returned goods lost or damaged in transit.
5. All products must be in a new and resaleable condition, of current design and in its original packaging. According to CE regulations, items returned opened must be regarded as "used" and cannot therefore be accepted back for credit.
6. TOC reserves the right to charge a 15% restocking fee.
7. Special customer ordered products such as prewelded bands are non-returnable.

Cancellations

TOC reserves the right to cancel an order or balance of order without liability. Customers are not able to cancel orders without the agreement of TOC. A charge may be made to cover costs already incurred where special items are cancelled.

Law

These terms and conditions shall be governed by and construed in accordance with the law of England and the parties hereby submit to the exclusive jurisdiction of the English courts.

*Thank you for choosing
